Current Research and Expertise

- Current Research:
 - Effect of distance to radiation facility on cancer treatment
 - Effect of insurance status on cancer stage at diagnosis and receipt of standard treatment
- Expertise:
 - Clinical knowledge on cancer treatment/outcomes
 - Statistical programming/modeling: Stata

Potential Areas of Collaboration Skills Sought

- Areas of Collaboration:
 - Understanding disparities in cervical cancer stage at diagnosis, receipt of standard treatment (including brachytherapy) and survival.
 - Exploring disparities specific to rural areas
- Skills sought:
 - GIS support/knowledge
 - Advanced statistical modeling
 - Public health
